Report of Independent Accountants

To the Board of Directors and Shareholder of RBC Dain Rauscher Inc.

In our opinion, the accompanying statement of financial condition presents fairly, in all material respects, the financial position of RBC Dain Rauscher Inc. (the "Company") at December 31, 2001 in conformity with accounting principles generally accepted in the United States of America. This financial statement is the responsibility of the Company's management; our responsibility is to express an opinion on this financial statement based on our audit. We conducted our audit of this statement in accordance with auditing standards generally accepted in the United States of America which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion. The statement of financial condition of the Company as of December 31, 2000 was audited by other independent accountants whose report dated February 5, 2001, expressed an unqualified opinion on that statement.

Our audit was conducted for the purpose of forming an opinion on the statement of financial condition taken as a whole. The information contained on pages 13 and 14 is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by Rule 17a-5 under the Securities Exchange Act of 1934 and Regulation 1.10 under the Commodity Exchange Act. Such information has been subjected to the auditing procedures applied in the audit of the statement of financial condition and, in our opinion, is fairly stated in all material respects in relation to the statement of financial condition taken as a whole.

February 21, 2002

Pricewarforbruse Cos seus LLP

The accompanying notes are an integral part of the statements of financial condition.

Notes to Statements of Financial Condition

1. Nature of Business

RBC Dain Rauscher Inc. (the "Company") is a registered broker-dealer in securities and an introducing futures commission merchant. The Company is a member firm of the New York Stock Exchange, Inc. ("NYSE") and other securities and commodities exchanges. The Company is a wholly owned subsidiary of RBC Dain Rauscher Corp. (the "Parent"). The Company offers full service brokerage and investment banking services to individual, institutional, corporate, and government clients. Additionally, the Company conducts principal trading primarily in municipal bonds and other fixed income securities. The Company also provides asset management services for its customers and clearing services to correspondent firms introduced through its RBC Dain Correspondent Services division. The Company carries all customer accounts of the introducing brokers and extends margin credit to its customers.

On January 10, 2001, Royal Bank of Canada ("RBC") acquired the Parent in a cash transaction accounted for as a purchase. The Company remains a wholly owned subsidiary of the Parent. On November 1, 2001, the Company changed its name from Dain Rauscher Incorporated to RBC Dain Rauscher Inc.

2. Summary of Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash in depository accounts with other financial institutions and money market investments with original maturities of 90 days or less.

Securities Transactions

Securities transactions and the related commission revenue and expense are recorded on a settlement date basis, which is not materially different than if transactions were recorded on a trade date.

Trading securities owned, trading securities sold, but not yet purchased and derivative financial instruments are stated at market value. The Company marks securities to market and determines market value by using public market quotations, quoted prices from dealers or recent market transactions, depending upon the underlying security.

The Company may, from time to time, receive equity instruments as compensation for certain underwriting transactions. The Company accounts for these instruments as investments and records them at fair value. The Company also has venture capital investments in securities that are currently non-marketable. These securities, which are accounted for at fair value, are included in other assets. Management has determined that cost generally approximates fair value for these investments. When the restrictions expire on these investments and they are readily marketable, the Company uses public market quotations to determine fair value. At December 31, 2001, the fair value of these equity instruments and venture capital investments was \$3.0 million.

Notes to Statements of Financial Condition, Continued

Resale and Repurchase Transactions

Securities sold under repurchase agreements or purchased under agreements to resell (resale agreements) are accounted for as collateralized financing transactions. The Company records these agreements at the contract amount at which the securities will subsequently be resold or reacquired, plus accrued interest. These agreements provide for termination by the Company or its counterparties on short notice. It is the policy of the Company to obtain possession of collateral with a market value equal to, or in excess of, the principal amount loaned under resale agreements. Collateral is valued daily and the Company may require counterparties to deposit additional collateral or return collateral pledged when appropriate.

Investment Banking and Underwriting Revenue

Underwriting management fees and the related selling concession are recorded when the transaction is complete and the Company's revenue is reasonably determinable (generally trade date.)

Underwriting fee revenue is recorded when determinable, generally 90 days after the transaction closes. Merger and acquisition and other advisory fees are recorded when earned and determinable.

Receivables From and Payables to Customers

Amounts receivable from customers are primarily margin balances. Other customer receivables and payables result from cash transactions. The Company does not include in its statement of financial condition either the securities owned by customers but held by the Company as collateral for margin loans or the securities sold short by customers.

Other Receivables

Included in other receivables are forgivable loans made to financial consultants and other revenue-producing employees, typically in connection with their recruitment. These loans are forgivable based on continued employment and are amortized over the term of the loan, which is generally three to eight years, using the straight-line method.

Depreciation and Amortization

Equipment is depreciated using the straight-line method over estimated useful lives of two to eight years. Leasehold improvements are amortized over the lesser of the estimated useful life of the improvement or the term of the lease.

Goodwill

Goodwill is primarily related to the 1998 acquisition of Wessels, Arnold & Henderson, LLC. Until December 31, 2001, the Company amortized this goodwill on a straight-line basis over 25 years. Effective January 1, 2002 the Company adopted Statement of Financial Accounting Standards No. 142 and as a result stopped amortizing goodwill. In management's opinion, no impairment exists as of December 31, 2001.

Income Taxes

The Company is included in the consolidated income tax returns filed by the Parent. The Company's provision for income taxes is recorded on the basis of filing a separate income tax return. Income taxes currently payable or receivable are paid to or received from the Parent.

Notes to Statements of Financial Condition, Continued

The Company determines deferred tax liabilities and assets and any provision for deferred income taxes based on the differences between the financial statement and tax bases of assets and liabilities at each year-end.

Fair Value of Financial Instruments

Substantially all of the Company's financial assets and liabilities are carried at fair value or at amounts which, because of their short-term nature, approximate fair value. The fair value of the Company's borrowings, if recalculated based on current interest rates, would not differ significantly from the amounts recorded at December 31, 2001.

Use of Estimates

The Company has made certain estimates and assumptions in reporting certain assets and liabilities and the disclosure of contingent liabilities in preparing these financial statements, and the reported amounts of revenues and expenses in conformity with accounting principles generally accepted in the United States of America. Actual results could differ from those estimates.

3. Receivable from and Payable to Brokers, Dealers and Clearing Organizations

		2001		2000
	(in thousands)			nds)
Receivable from brokers and dealers:				
Deposits for securities borrowed	\$	196,661	\$	157,274
Securities failed to deliver		71,078		26,517
Clearing organizations, correspondent brokers and other		5,861		14,951
	\$	273,600	\$	198,742
Payable to brokers and dealers:				
Deposits for securities loaned	\$	489,664	\$	657,805
Securities failed to receive		113,562		28,575
Clearing organizations, correspondent brokers and other		12,250		11,938
	\$	615,476	\$	698,318

Securities failed to deliver and receive represent the contract value of securities that have not been delivered or received by the Company or its counterparties subsequent to settlement date. Securities borrowed and securities loaned are recorded at the amount of cash collateral advanced or received in connection with the transaction. The Company or its counterparties may terminate these transactions on short notice. Securities borrowed transactions require the Company to deposit cash

Notes to Statements of Financial Condition, Continued

as collateral with the lender. With respect to securities loaned, the Company receives cash as collateral. The initial collateral advanced or received has a market value equal to or greater than the market value of the securities borrowed or loaned. The Company monitors the market value of the securities borrowed and loaned on a daily basis and requests additional collateral or returns excess collateral.

4. Trading Securities

The market values of trading securities at December 31, 2001 and 2000 are summarized as follows:

	2001 (in tho	usai	2000 nds)
Owned: U.S. Government and Government agency securities Municipal securities Corporate fixed income and other securities Equity securities	\$ 196,090 134,439 57,843 4,182	\$	134,343 155,635 32,935 6,414
	\$ 392,554	\$	329,327
Sold, but not yet purchased: U.S. Government and Government agency securities Corporate fixed income and other securities	\$ 159,150 9,048 168,198	\$ 	40,595 6,869 47,464

Trading securities owned includes \$135.4 million and \$57.0 million of U.S. Government and Government agency securities that were subject to repurchase agreements at December 31, 2001 and December 31, 2000, respectively. Trading securities sold, but not yet purchased includes \$158.6 million and \$36.1 million of U.S Government and Government agency securities that were subject to resale agreements at December 31, 2001 and December 31, 2000, respectively.

5. Long-Term Borrowings

On August 17, 2001, the Company entered into a \$100 million term loan agreement with RBUS LLC, an RBC affiliate. The loan matures on August 10, 2006 with no scheduled principal payments until maturity. Interest is paid quarterly and is based on the 90-day LIBOR rate plus 0.325%.

Notes to Statements of Financial Condition, Continued

6. Liabilities Subordinated to Claims of General Creditors

On March 31, 1998, the Company entered into an \$80 million subordinated term loan agreement with a group of banks that was unsecured and incurred interest at 160 basis points over LIBOR. Principal payments of \$5 million per quarter began April 1, 1999 with the final payment due on December 31, 2002. However, following the acquisition by RBC, the Company repaid all amounts outstanding under this subordinated term loan agreement

In April 2001, the Company entered into a five-year \$240 million subordinated debt agreement with RBUS LLC, an RBC affiliate. The subordinated debt matures in April 2006 with no scheduled principal payments until maturity. Interest is paid quarterly and is based on the 90-day LIBOR rate plus 0.775%.

The liabilities subordinated to claims of general creditors are covered by agreements approved by the NYSE and are available in computing net capital under the Securities and Exchange Commission's Uniform Net Capital Rule. To the extent such borrowings are required for the Company's continued compliance with minimum net capital requirements (Note 7), they may not be repaid.

7. Regulatory Requirements

As a broker-dealer and member firm of the NYSE, the Company is subject to the Uniform Net Capital Rule (the "Rule") of the Securities and Exchange Commission ("SEC"). The Rule is designed to measure the general financial integrity and liquidity of a broker-dealer and the minimum net capital deemed necessary to meet the broker-dealer's continuing commitments to customers. The Rule provides for two methods of computing net capital. The Company uses what is known as the alternative method. Under this method, minimum net capital is defined as the greater of \$1 million or 2% of aggregate debit items from customer transactions. In addition to the SEC rule, the NYSE may also require a member organization to reduce its business if net capital is less than 4% of aggregate debit items and may prohibit a member firm from expanding its business and declaring cash dividends if its regulatory net capital is less than 5% of aggregate debit items. Failure to maintain the required net capital may subject a firm to suspension or expulsion by the NYSE, the SEC and other regulatory bodies and may ultimately require its liquidation. The Company has at all times maintained its net capital above both SEC and NYSE required levels. At December 31, 2001, the Company had net capital of \$111.2 million, or 10.19% of aggregate debit items, which was \$89.3 million in excess of 2% of aggregate debit items and \$56.6 million in excess of 5% of aggregate debit items. The Company is also subject to the minimum financial requirements of the Commodity Exchange Act, which based on the Company's commodity activity, are below those of the SEC requirements.

Also, in accordance with the SEC's no-action letter dated November 3, 1998 the Company computes a reserve requirement for the proprietary accounts of introducing brokers ("PAIB"). At December 31, 2001 the Company had no PAIB deposit requirement.

Rule 15c3-3 of the Securities Exchange Act of 1934 specifies when broker-dealers carrying customer accounts may be required to maintain cash or qualified securities in a special reserve

Notes to Statements of Financial Condition, Continued

account for the exclusive benefit of customers. Based on the December 31, 2001 Rule 15c3-3 calculation, the Company was not required to maintain a balance in the special reserve account.

8. Commitments and Contingent Liabilities

Leases

The Company leases office space, furniture and communications and data processing equipment under several non-cancelable operating leases. Most office space lease agreements include rate increases and cover payment of real estate taxes, insurance and other expenses of occupancy.

Aggregate minimum rental commitments as of December 31, 2001, are as follows:

•		perating Leases
	(in t	housands)
2002	\$	33,092
2003		30,448
2004		26,268
2005		23,537
2006		20,980
Thereafter		32,364
Total minimum lease payments	\$	166,689

Litigation

The Company is a defendant in various actions, suits and proceedings before courts, arbitrators and governmental agencies. Certain of these actions, including those described below, claim substantial damages and could have a material adverse effect on the Company's financial condition or results of operations, should these matters not be resolved favorably. While the outcome of any litigation is uncertain, management believes, based in part upon consultation with legal counsel, that the resolution of all matters pending or threatened against the Company will not have a material adverse effect on the Company's financial condition or results of operations.

The Company is involved in three actions concerning The Midwest Life Insurance Company ("MWL"). MWL, a former subsidiary the Company acquired in 1980 and sold in early 1986, issued annuities that were sold primarily through the private client sales force of Dain Bosworth Incorporated, a predecessor broker-dealer. MWL was sold twice subsequent to its 1986 sale by the Company, was relocated from Nebraska to Louisiana by its final owner, Southshore Holding Corp., and was declared insolvent and ordered liquidated by the State of Louisiana in August 1991. Suits against the Company by policyholders and state guaranty associations (which had reimbursed most policyholder losses) followed. The Company settled certain of these cases in late 1998 and early 1999 for a total of approximately \$44 million.

Notes to Statements of Financial Condition, Continued

The first of the remaining MWL cases was brought against the Company by the liquidator of MWL and is pending in federal court in Louisiana. The complaint alleges violations of the Racketeer Influenced and Corrupt Organizations Act ("RICO") and certain state law claims. The plaintiff is seeking to recover in excess of \$59 million in compensatory damages, plus treble damages under RICO, interest, costs, attorneys' fees and other relief. The complaint challenges certain coinsurance transactions between MWL and Central National Life Insurance Company ("Central National," also a defendant) in 1980 and the subsequent reporting of those transactions.

The court referred all claims against Central National to binding arbitration and stayed all proceedings concerning the claims against the Company, including resolution of the Company's motion to dismiss, pending resolution of the Central National claims. In October 2001, prior to commencement of the arbitration, Central National settled all claims against it for a payment of \$1.2 million to the liquidator. The stay on the Company proceedings has not yet been lifted.

In the second case, filed in November 1999, the Company seeks to recover from the State of Louisiana the amounts the Company paid in settlement of claims against it, on the ground that intentional and other acts of officials of the Louisiana Insurance Department and the Louisiana Office of Financial Institutions caused the demise of MWL and the Company's losses. The case is pending in the Louisiana state courts. The State has counterclaimed for attorney's fees and losses it may incur in the litigation described below.

In the third and final case, individual Louisiana residents who held Midwest Life policies sued the State, also on the ground that intentional and other acts of officials of the Louisiana Insurance Department and the Louisiana Office of Financial Institutions caused the demise of MWL and their losses. This case began in 1992 and during 2001 the State of Louisiana brought in the Company as a third party defendant. The theory and damages asserted by the State seem to be the same as in the case described above.

9. Off-Balance Sheet Risk

The Company may enter into transactions involving derivative financial instruments. Derivative financial instruments are defined as a future, forward, swap or option contract, or as an interest rate swap, floor, or collar. Generally, a derivative represents a future commitment to purchase or sell a financial instrument at specific terms and dates. These financial instruments may have market or credit risk, which is not reflected in the market values included on the statement of financial condition.

The Company has risk management policies that limit the size and risk of securities owned and securities sold, not yet purchased. These policies include a risk point methodology, which assigns risk points to certain inventories based on modified duration (adjusts all securities to a one-year maturity). The Company also monitors inventories for factors that include credit and concentration risk, contract length, and inventory age. These inventories are held primarily for distribution to individual and institutional clients in order to meet those clients' needs. The Company does not enter into derivative financial instruments with off-balance-sheet risk other than those described in this footnote. The Company utilizes these types of derivatives to manage risk exposure.

C

Notes to Statements of Financial Condition, Continued

Market Risk

As part of its broker-dealer activities, the Company purchases and sells a variety of cash and derivative financial instruments in order to reduce exposure to market risk. Market risk includes changes in interest rates, currency exchange rates, indices, or value fluctuations in the underlying financial instruments. The Company's hedging strategy involves the purchase and sale of derivative financial instruments to offset market risk associated with other transactions. The Company regularly sells securities not yet purchased (short sales) for its own account, primarily to hedge fixed income-trading securities. Short positions may expose the Company to market risk in the event prices increase, as it may be obligated to acquire the securities at prevailing market prices.

The Company uses notional (contract) amounts to measure derivative activity. Notional amounts are not included on the Company's statement of financial condition, as these contract amounts are not actually paid or received. Notional amounts allow the Company to calculate the cash flows to be exchanged and its involvement in any particular type of financial instrument; however these amounts are not indicative of overall market risk.

The Company may also pledge customers' securities as collateral for bank loans, securities loaned, or to satisfy margin deposit requirements of various exchanges. In the event the Company's counterparty is unable to return the securities pledged, the Company might need to acquire the securities at prevailing market prices. In the case of repurchase agreements, the Company risks holding collateral at a market value less than that of the related pledged securities. To control these risks, the Company monitors the market value of securities pledged and requires adjustments of collateral levels when necessary.

Credit Risk

The notional amounts of derivative instruments also do not represent the Company's potential risk from counterparty nonperformance. The Company periodically offsets its market risk resultant from fixed income trading by entering into financial futures or option contracts. Transactions in futures contracts are conducted through regulated exchanges, which guarantee performance of counterparties and are settled in cash on a daily basis, minimizing credit risk. Management believes that the Company's exposure to credit risk is represented by the fair value of trading securities owned.

Customer Activities

In the normal course of business, the Company executes, settles, and finances customer securities transactions. Customers' securities activities are transacted on either a cash or margin basis. As part of these customer transactions, the Company trades option contracts and also sells borrowed securities on their behalf (short sales). The risk with these transactions is that customers may fail to satisfy their obligations, requiring the Company to purchase or sell various financial instruments at prevailing market prices to fulfill customer obligations.

Notes to Statements of Financial Condition, Continued

The Company mitigates risk by requiring customers to maintain margin collateral in compliance with both regulatory and internal guidelines. The Company monitors necessary margin levels daily and requires customers to either deposit additional collateral or reduce margin positions. Market declines could reduce the value of collateral to below the amount the Company has loaned, plus interest, before the Company is able to sell the collateral, but due to daily monitoring of valuations and the amount of collateral the Company requires management believes this risk to be minimal.

Deferred Compensation Hedge

As further described in Note 13, the Company has entered into a total return swap. Management monitors exposure on this transaction by evaluating the effectiveness of this hedge on a monthly basis.

10. Related Party Transactions

The Company receives certain fees from an affiliated asset manager for sales of money market fund shares. The Company's customers are the sole investors in these money market funds. Under an informal agreement, this affiliate compensates the Company based on a percentage of net assets of these money market funds.

11. Employee Benefit Plans

The Company sponsors a retirement plan that covers substantially all full-time employees. For the years ended December 31, 2001 and 2000, participants could contribute, on a pretax basis, up to 15% of their eligible compensation subject to certain aggregate limitations. Once eligible, the Company would then match 100% of the first 3% of eligible compensation deferred through a fixed matching contribution. At the end of each year, an additional variable matching contribution is determined. The matching rate is applied against the first 3% of eligible compensation deferred, and can range from 0 up to 200%. The variable matching contribution is invested at the direction of the participants.

Notes to Statements of Financial Condition, Continued

13. Retention Bonus Pool

In connection with the acquisition of the Parent by RBC, certain officers and key employees of the Company are eligible to participate in a \$200 million retention bonus pool (the "Pool"). Participants in the Pool were granted units on January 10, 2001, with an aggregate value of \$200 million based on the value of RBC common stock at that date. The units will fluctuate in value based upon the value of RBC common stock and will be paid in cash upon vesting. These units vest over a period of up to four years from the date of the agreement.

The Company's ultimate cash obligation for the units fluctuates based on the per share market value of RBC common stock. The Company has hedged its exposure to changes in value of RBC common stock by entering into a total return swap (the "Swap") with an affiliate of RBC. Under the Swap agreement, the Company pays interest to the counterparty at a rate based on LIBOR plus 0.32% on the notional value, as described in the Swap agreement, in exchange for receiving the rate of return of RBC common stock on the notional value. The Company recognizes other comprehensive income/loss for changes in the value of the Swap, that relates to the hedged portion of the Pool that has not yet been recognized as compensation expense. At December 31, 2001 \$1.3 million of expense associated with the Swap is reflected in other comprehensive loss.

14. Income Taxes

In accordance with the inter-company tax sharing agreement, the Company calculates its tax benefit on a separate company basis and the total amount of taxes payable or receivable (current and deferred) are recorded on a net basis.

The tax effects of temporary differences that give rise to deferred tax assets and deferred tax liabilities relate primarily to compensation accruals not currently deductible, reserves maintained for accounting purposes and goodwill.

The company has reviewed the components of its deferred tax asset and has determined that is more likely than not that the asset will be realized.

SUPPLEMENTAL SCHEDULES

Computation of Net Capital Under Rule 15c3-1 of the Securities and Exchange Commission

December 31, 2001 (In Thousands)

Net capital: Total shareholder's equity Additions:	\$ 223,682
Liabilities subordinated to claims of general creditors allowable in computation of net capital	240,000
Total capital and allowable subordinated liabilities	 463,682
Deductions and other charges: Nonallowable assets: Goodwill, net of amortization Equipment and leasehold improvements, net of depreciation and amortization	103,880 31,492

Report of Independent Accountants on Internal Control Required By SEC Rule 17a-5 and CFTC Regulation 1.16

To the Board of Directors and Shareholder of RBC Dain Rauscher Inc.

In planning and performing our audit of the financial statements and supplementary schedules of RBC Dain Rauscher Inc. (the "Company") for the year ended December 31, 2001, we considered its internal control, including control activities for safeguarding securities, in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control.

Also, as required by Rule 17a-5(g)(1) of the Securities and Exchange Commission (the "SEC") and Regulation 1.16 of the Commodity Futures Trading Commission (the "CFTC") (collectively, the "Commissions"), we have made a study of the practices and procedures followed by the Company, including tests of compliance with such practices and procedures, that we considered relevant to the objectives stated in Rule 17a-5(g) and Regulation 1.16, in the following:

- 1. Making the periodic computations of aggregate debits and net capital under Rule 17a-3(a)(11) and the reserve required by Rule 15c3-3(e);
- 2. Making the quarterly securities examinations, counts, verifications, and comparisons, and the recordation of differences required by Rule 17a-13;
- 3. Complying with the requirements for prompt payment for securities under Section 8 of Federal Reserve Regulation T of the Board of Governors of the Federal Reserve System;
- 4. Obtaining and maintaining physical possession or control of all fully paid and excess margin securities of customers as required by Rule 15c3-3;
- 5. Making the periodic computations of minimum financial requirements pursuant to Regulation 1.17.

Because the Company does not carry commodity accounts for customers or perform custodial functions relating to customer's commodity accounts, we did not review the practices and procedures followed by the Company in any of the following:

- 1. Making the daily computations of the segregation requirements of Section 4d(2) of the Commodity Exchange Act and the regulations thereunder, and the segregation of funds based upon such computations; and
- 2. Making the daily computations of the foreign futures and foreign options secured amount requirements pursuant to Regulation 30.7 of the CFTC.

PRICEWATERHOUSE COPERS @

The management of the Company is responsible for establishing and maintaining internal control and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of control and of the practices and procedures referred to in the preceding paragraph, and to assess whether those practices and procedures can be expected to achieve the Commissions' abovementioned objectives. Two of the objectives of internal control and the practices and procedures are to provide management with reasonable, but not absolute, assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in accordance with generally accepted accounting principles. Rule 17a-5(g) and Regulation 1.16 list additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in internal control or the practices and procedures referred to above, errors or fraud may occur and not be detected. Also, projection of any evaluation of internal control to future periods is subject to the risk that controls may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

Our consideration of internal control would not necessarily disclose all matters in internal control that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of one or more of the specific internal control components does not reduce to a relatively low level the risk that errors or fraud in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. However, we noted no matters involving internal control, including procedures for safeguarding customer and firm assets, including securities, that we consider to be material weaknesses as defined above.

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the Commissions to be adequate for their purposes in accordance with the Securities Exchange Act of 1934, the Commodity Exchange Act, and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures were adequate at December 31, 2001 to meet the Commissions' objectives.

This report is intended solely for the information and use of the Board of Directors, management, the SEC, the CFTC, the New York Stock Exchange, Inc. and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered brokers and dealers, or Regulation 1.16 under the Commodity Exchange Act, and is not intended to be and should not be used by anyone other than these specified parties.
